- The MDAemon Windows-based email sever is one of the most widely used servers on the Internet*

Customer Profile

Small-to-medium business/enterprise (SMB/SME) companies with fewer than 1,000 employees looking for affordable and secure email trust Alt-N Technologies. Businesses with limited IT resources benefit from the easy-to-use design of its products, which can be quickly installed and require minimal administration and maintenance. Alt-N Technologies' customers exist in almost every industry segment, which include Legal, Healthcare, Government, Education and manufacturing, to name just a few.

Industry Comments

"The bottom line: MDAemon is very well suited as a standalone server for small and medium-sized companies."

Network Computing

"MDAemon Pro is loaded with features. I recommend it for those who need its unique features and want a high degree of configurability."

Windows IT Pro

"Popular with small businesses as a simpler, more affordable alternative to Microsoft Exchange, MDAemon Pro majors on performance, security and comprehensive groupware capabilities."

Personal Computer World

Trusted Messaging Solutions

The mission of Alt-N Technologies is to listen to our customers and deliver the most feature-rich, affordable and secure messaging solutions in the industry. Alt-N Technologies was one of the first email developers to incorporate authentication and identity standards into its email platform. The company works with industry groups and associations on the latest security methods to ensure it is delivering the most secure and trustworthy email available.

Industry Association Participation

Internet Engineering Technology Forum (IETF), Domain Assurance Council (DAC), and Messaging Anti-Abuse Working Group (MAAWG).

Product Portfolio

- **MDaemon® Email Server** - a Windows-based email server that provides full email server functionality that installs in minutes and requires minimal support and administration.
- **SecurityPlus for MDAemon** - extends and offers an additional layer of protection for MDAemon through an additional Kaspersky Lab anti-virus engine and Outbreak Protection from Commtouch.
- **Outlook Connector for MDAemon** - enables employees to use the collaborative functions of Microsoft Outlook without requiring the expense or expertise of the Microsoft Exchange server.
- **RelayFax®** - a powerful fax server that automates sending, receiving and managing network faxes, and integrates full faxing capabilities directly into your existing email system.
- **SecurityGateway for Exchange/SMTP Servers** - delivers reliable email security using a powerful spam filter that protects against malware. It offers intuitive features to analyze, manage and report on inbound and outbound email traffic patterns.
- **ProtectionPlus for Security Gateway** - extends and compliments SecurityGateway features by offering an additional Kaspersky Lab anti-virus engine and Outbreak Protection from Commtouch.
