Report Time is the time delay in hours and minutes between when SecurityPlus detected the outbreak and the creation of the report. Report is compiled from Commtouch data.

Zero Hour Detection. The SecurityPlus column shows the date and time when SecurityPlus detected the outbreak.

Blocked some of the attack. Delay time is in hours and minutes (hh:mm).
Time listed is the difference between the detection time as reported by AV-Test.org and the SecurityPlus detection time. The later is not included in AV-Test.org reports.

No detection during the reporting period.
